Professional Development**

Practical Data Analysis using R for Researchers

This course has a total study load of 40 hours, with 24 hours of face-to-face instruction.

The following topics were covered during the course:

- Introduction to the open software environment: R.
- Data Handling, Exploratory Data Analysis and Data Visualization.
- Statistical Testing, Estimation and Probability Fitting.
- Linear Models: Regression and ANOVA model building.
- Linear Models: Logistic Regression.
- Aspects of Experimental Design.
- From Statistics to Data Science: the Modern Approach!
- Prediction and Classification: Decision Trees & Neural Networks.
- Data Reduction: Principal Components and Cluster Analysis.
- Interpretation and Presentation of the Results in a sound and responsible way to their own research data.
